DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-14, 19-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee U.S. Patent Number 7,047,561.

Re Claims 1, 19, 22, 28, 29, fig. 1 teaches a internal IP network 110 (a network) supporting routing of VOIP wherein VOIP packets (carrying media in a VOIP) from client 114 are forced through manage network element 100 of a specific IP address with a call signaling and selected media (See fig. 2 and also See col. 4, lines 15 +).

Re Claims 2, 4, refer to claim 1, See client 114 (originate...endpoint).

Re Claims 3, 5-14, 20, 21, 23-27, refer to claim 1, fig. 2 supports RTP, call signaling proxy, media proxy, NAT for replacing and hiding client addresses, wherein the list of IP addresses can static and dynamic.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2616

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee U.S. Patent Number 7,047,561 in view of Zisapel et al U.S. Patent Number 6,718,359.

Re Claim 15-18, Lee fails to explicitly teaches "selecting.....servers that provide a...quality" by using a series of pings. However, Zisapel et al teaches a network element determines information regarding hops, quality, network proximity, status and availability by pinging each network servers (See fig. 1A). One skilled in the art would have been motivated to combine the teaching to enable Lee to maintain a predetermined quality of the VOIP traffic in its managed network. Therefore, it would have been obvious to one ordinary skilled to combine the teachings.

Response to Arguments

5. Applicant's arguments with respect to claims 1-29 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.
